How to Allow Cookies for Stride (for Faster Loading Time)
For faster loading time when you play Stride games, you should allow cookies in your internet browser. Here’s how to allow cookies for these popular browsers:

**Google Chrome**

1. Click on the “customize and control” menu at the top-right. (It looks like three solid lines.)
2. Click the “Settings” controls. A new tab will open.
3. At the bottom of the page, click on “Show advanced settings.”
4. Under “Privacy” click on “Content settings.” A new small window will open.
5. Under “Cookies” select “Allow local data to be set (recommended)”.

**Firefox**

1. Click on the Firefox menu at the top-left.
2. Select “Options.”
3. Click on the Privacy tab.
4. Next to “Firefox will:” check to see which setting is selected in the pull-down menu.
   a. If it is “Remember History,” then you should be OK.
   b. If it is “Never Remember History,” you will need to change this setting to “Remember History” or to “Use Custom Settings for History.”
   c. If it is “Use Custom Settings for History,” make sure that “Accept cookies from sites” is selected. Next to “Keep Until:” you will select “they expire.”
5. Click OK.

**Internet Explorer**

1. Click the Tools menu at top-right. (It should look like a gear icon.)
2. Select “Internet Options.”
3. Click on the Privacy tab.
4. Click on the “Default” button (or manually slide the bar down to “Medium”).
   a. If you want to manually customize your options, click the “Advanced” button to the left of “Default.” Next, select “Override automatic cookie handling.” Make sure you “Accept” First-Party Cookies and have “Always allow session cookies” selected.
Apple Safari

1. Click the Safari menu at the top-right. It should look like a gear icon. (In newer versions of Safari, click the “Safari” dropdown at the top left of your screen and select “Preferences.”)
2. Select “Preferences.”
3. Click on the Privacy tab.
4. Under the “Block Cookies” section, select either “From third parties and advertisers” or “Never.”

Apple Safari on iPad

1. Go into your Settings.
2. Select Safari.
3. In iOS 7 versions, under the Privacy & Security section, make sure Block Cookies is set to either “From third parties and advertisers” or “Never.”
4. In versions earlier than iOS 7, Under Privacy, make sure Accept Cookies is set to either “From Visited” or “Always.”
