Middle School Digital Curriculum
High Expectations for All Students
New! Apex Learning Digital Curriculum for Grades 6–8

Inspired by the very real challenges teachers face in their classrooms every day, Apex Learning Middle School Tutorials ensure every student meets grade-level expectations and has a solid foundation for success in high school and beyond.

With content developed for the latest middle school standards, Tutorials in math and English language arts offer direct instruction, meaningful practice, and formative assessment. Tutorials enable teachers to individualize instruction and meet the challenge of ensuring every student is achieving to his or her potential.

Key Component of Blended Learning

With rigorous, standards-based content and the flexibility to implement a range of blended learning models, Tutorials meet teachers’ requirements as they strive to individualize instruction, provide concept recovery and targeted remediation, and prepare students for high-stakes exams.

Interactive App-like Design

The unique organization of Tutorials — Learn It, Try It, Review It, Test It — engages today’s tech-savvy students.

The instruction, assessment, and immediate feedback offer students multiple opportunities to learn by doing as they observe, inquire, create, connect, and confirm their understanding.

To focus student learning, prescriptive pretests identify which learning objectives a student has mastered and which require additional attention.

Meaningful Real-Time Data

Equip teachers, administrators, and students with the information they need to make informed instructional decisions based on real-time progress and performance data.
